Javascript

2 Job title stopwords (we should be able to select from the list and add new ones)

Default:

Manager

Assistant

3 Blacklist - If a company is on the blacklist, don't parse any of their job postings.

4 Company Acronyms - LLC. Ltd. L.L.C - disregard these ending in company names

5 Ignored locations (we should be able to select from the list and add new ones)

6 Company stopwords - List of the stop words; if one of them is in the job description or available on a company page within the job, board add this company to the blacklist.

Input Data:

The oldest job posting date (counted in days, default value ≥ 14 days)

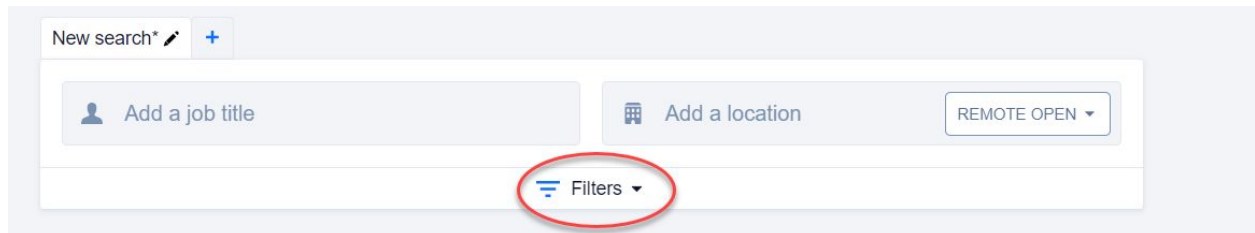

(we should be able to change a number of days)

Keywords to Exclude (for this job board only): agency, recruitment, recruiting, placement, university, governmental, staffing, non-profit, outsourcing.

You need to log in to be able to use this job board (we want to be able to change&save logins and passwords)

Filtering:

1. Extend *Filters*

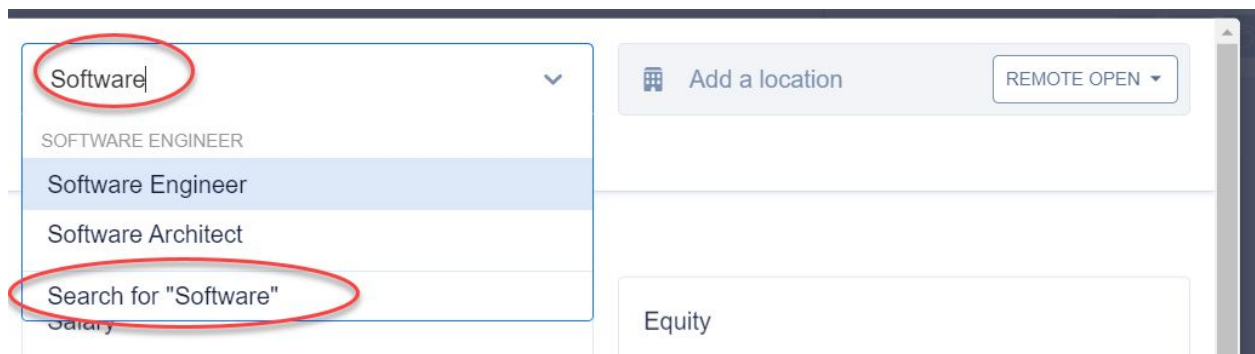

New search*  

 Add a job title  Add a location REMOTE OPEN ▾

 Filters ▾

2. Add *Job Title Keywords* to the *Add a Job Title* field (each keyword should be added separately). Make sure to always choose the last option from the dropdown. It starts with *Search for “*.

Immigration + Network

7. When the filters are all set up, click *View results*.

8. Sort by: *Newest*.

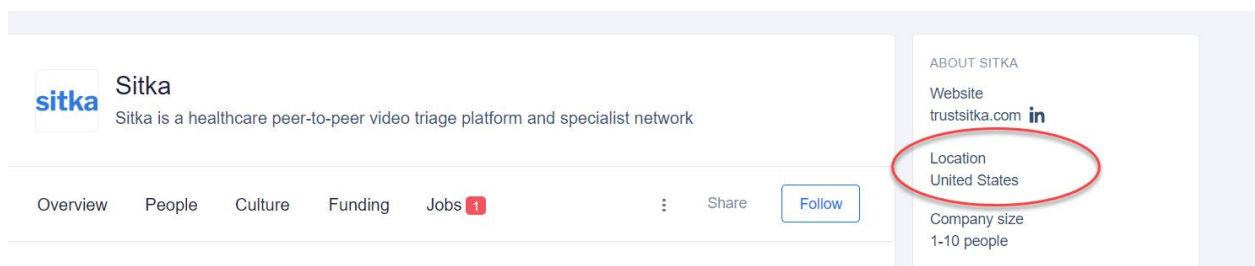

Filtering on the Search page:

1. Check through *Posting Date*
2. Run *Company Name* through the Black List and the list of companies that were already added
3. Check through *job title stopwords*.
4. Check through the *job title keywords*.

Filtering on the posting page:

1. Check by the company's location. Only a country needs to be checked, a city/town doesn't matter. The company location is shown on the right side of the posting page in the *About* section.

- We might not have such a country on the list as it could be written in a local language, i.e. Deutschland, but it fits the search as well.
- It also fits if only a city/town is written
- If there is no location mentioned at all, it fits the search.

2. Run a job description through the *stop words* list.

This section starts with *About us*:

Software Engineer - Backend Engineer
